Pricing Guide

Service estimate ranges (UGX)

This guide summarizes the prices currently produced by the website booking estimator. Amounts are per service unit shown; enter the requested quantity in your description for the estimator to multiply the estimate.

> **Small / basic projects:** UGX 20,000 for each separately priced item or unit. This is a fixed starting estimate regardless of the service selected.

How the estimator works

Small / basic	UGX 20,000 per detected quantity.
Standard	Uses the service's configured starting rate at 60% and upper rate at 18%. If the upper amount would be below the starting amount, the displayed estimate is a single amount.
Large / complex	Uses the service's configured starting rate at 90% and upper rate at 36%. The upper amount is never displayed below the starting amount.
Quantity	Recognized quantities in the description (for example, “2 flyers”) multiply the estimate. The estimator accepts up to 100 separately priced units; contact us for larger quantities.
Custom service	Choose “Others” to request a consultation; the estimator does not calculate a price for custom services.

These are indicative estimates, not a quotation or final approved price. Final pricing may be confirmed after the project requirements are reviewed. Amounts below are shown per the unit listed.

TEZNET NETWORKS

Network services

Service	Unit	Standard	Large / complex
